

CUSTOMER INFORMATION

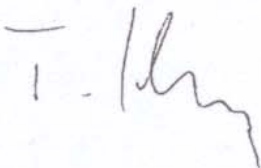

KTW-approval for material H-Ecopur (red)

According to recently received information from the German Federal Office of Health (BGA) we can confirm the following:

1. Investigations made by the German Federal Office of Health (BGA) confirm, that H-Ecopur is a suitable sealing material to be used in drinking water.
2. H-Ecopur corresponds with the positive lists of the German Federal Office of Health (BGA) and is therefore qualified to be used with food, according to the german foodlaw.

Please use the above mentioned recommendations from Germany as world-wide acknowledged references for the use of H-Ecopur in the field of drinking water and food applications.
